

AI-Powered All-in-One Marketing, Sales & Employee Performance CRM

(TECHNICAL BUILD DOCUMENT FOR DEVELOPMENT TEAM)

1. VISION & OBJECTIVE

This CRM is not a normal CRM.

Goal:

- Fully automate **marketing, lead generation, sales execution, employee tracking, and performance improvement** for *any type of business*.
- Business owner should **not depend on multiple tools or human monitoring**.
- System should **think, act, analyze, and suggest automatically using AI**.

End Result:

- More reach
 - More leads
 - Faster conversions
 - Higher employee productivity
 - Zero manual dependency
-

2. PROBLEMS THIS CRM SOLVES

Current problems in market:

- Businesses use 5–10 different tools (CRM, WhatsApp, Email, Ads, Analytics)
- No clear employee accountability
- No AI guidance to improve sales conversations
- Ads are manual, platform-dependent, and non-optimized
- No visibility on how much effort an employee is actually putting

This CRM solves all of them in ONE SYSTEM.

3. TARGET USERS

- Small & Medium Businesses (SMBs)
- Real Estate Companies
- Training & Placement Consultancies
- Marketing Agencies

- Food & Retail Businesses
- Service-based Businesses

User Roles:

- Super Admin (Owner)
 - Admin (Operations)
 - Manager (Team Lead)
 - Employee (Sales/Marketing)
 - AI Coach (System Role)
-

4. SUPPORTED MARKETING CHANNELS (MANDATORY)

4.1 Social Media Platforms

The CRM must integrate and manage:

- Facebook
- Instagram
- LinkedIn
- Twitter (X)
- YouTube

All posting, campaigns, analytics should be done **only via CRM**.

4.2 Direct Marketing Channels

- WhatsApp Business API
- Email Marketing (Bulk + Sequences)
- Telecalling (Auto Dialer + Recording)

No external tool usage allowed.

5. AI-BASED AUTO AD GENERATION (CORE FEATURE)

5.1 Business Understanding Layer (AI)

CRM AI should understand:

- Business type
- Products / Services
- Target geography
- Target audience (age, profession, interest)
- Platform behaviour

This data comes from onboarding + ongoing learning.

5.2 Platform-Wise Ad Intelligence

Same business → **Different ad per platform**

Platform	Ad Nature
Instagram	Youthful, emotional, short reels
Facebook	Trust, family, local reach
LinkedIn	Professional, B2B, career oriented
YouTube	Storytelling, educational
Twitter	Short, bold, opinion based

5.3 Auto Ad Creation (Daily)

CRM should auto-generate:

- 1–2 ads per day per business
- Formats:
 - 30 sec video
 - 60 sec video
 - Image + caption
 - Reel-style viral shots

AI should:

- Write script
 - Generate caption
 - Choose emotion
 - Suggest CTA
 - Optimize hashtags
-

6. AUTO POSTING & CAMPAIGN MANAGEMENT

CRM should support:

- Bulk posting
- Scheduled posting
- Auto repost best performing ads
- Platform-wise publishing
- Campaign tagging

Employees only approve or monitor.

7. LEAD GENERATION & FLOW (AUTOMATED)

7.1 Lead Sources

- Social media ads
- WhatsApp campaigns
- Email campaigns
- Website forms
- Manual upload

7.2 Lead Lifecycle

1. Lead enters CRM
2. Source auto-tagged
3. Auto assigned to employee
4. Follow-up auto created
5. SLA tracking starts

No Excel. No manual allocation.

8. EMPLOYEE WORKFLOW (MANDATORY CRM USAGE)

Employees must do **everything inside CRM**:

- Calls
- WhatsApp chats
- Emails
- Notes
- Follow-ups

Any work outside CRM = **Not counted**.

9. EMPLOYEE PERFORMANCE TRACKING (AUTOMATIC)

CRM should track:

- Calls/day
- Talk time
- WhatsApp sent & replies
- Emails sent & replies
- Follow-ups done/missed

- Leads converted
- Revenue generated

All auto-calculated.

10. AI CALL LISTENING & SALES COACHING

10.1 Call Recording

- Every call recorded
 - Stored securely
-

10.2 AI Call Analysis

AI should analyze:

- Communication quality
 - Confidence
 - Objection handling
 - Customer interest signals
-

10.3 AI Coaching Output

AI gives suggestions:

- How to talk better
- What went wrong
- What to improve
- Next follow-up strategy

Employee becomes better automatically.

11. LEAD CONVERSION INTELLIGENCE

CRM should track:

- Time taken to convert lead
- Number of follow-ups
- Drop-off reason

AI should predict:

- High conversion leads
 - At-risk leads
 - Best employee for lead
-

12. ONE-CLICK PERFORMANCE DASHBOARD

When admin clicks an employee:

- Total leads
- Conversion %
- Avg response time
- Communication score
- Effort score
- Revenue contribution
- AI improvement tips

No manual review needed.

13. TECHNICAL ARCHITECTURE (HIGH LEVEL)

Frontend

- Web: React
- Mobile (Phase-2): Flutter

Backend

- API Gateway
- Auth & RBAC
- Lead Service
- Activity Service
- Telephony Service
- WhatsApp Service
- Email Service
- AI Engine

Database

- PostgreSQL (Core)
 - Redis (Cache & queues)
 - Object storage (Call recordings)
-

14. PHASED DEVELOPMENT PLAN

Phase 1 – Foundation

- Users & roles
- Lead management
- Calling
- WhatsApp
- Dashboards

Phase 2 – AI Enablement

- Auto ads
- Auto posting
- Call analysis

Phase 3 – Full Automation

- Prediction
- Recommendations
- Self-learning AI

15. FINAL EXPECTATION

This CRM should:

- Think like a marketing expert
- Act like a sales manager
- Monitor like an auditor
- Coach like a trainer

Human role = Decision System role = Everything else
